

NEW PC GAME: THE SKELETON WAR

October 19th, 2015 marks the warmly-anticipated release of *The Skeleton War*, the game that lets you bring your friends together to tear them apart!

In *The Skeleton War* you take command of a skeleton, freshly risen from the grave in the dead of the night to join the eponymous war. As a skeleton you may lose and regain your bony limbs as you run, hop, and crawl your way around the battlefield.

Take up arms against your foes—their arms, if you like—or lob powerful bombs into their midst to send them back to the grave from whence they came.

The Skeleton War is out now on PC, available to download from <http://www.indiedb.com/games/the-skeleton-war>. Will you join the fight for dominion of the night?

The Skeleton Crew is a small indie development team based in Brisbane, Australia. *The Skeleton War* is their first published game.
